作品集要求：

- A portfolio of design projects is required. The portfolio should contain at least three examples of projects and the examples must be able to demonstrate the applicant's proficiency in designing with consideration to technical functionality, user interaction and experience, as well as elements of aesthetics. A portfolio that takes into account all the three aspects as an integrated whole in all the examples is preferred.
- Instructions specific to Chalmers on how, when and where to submit your portfolio are available under section 7 on the page Required documents.
- Label the portfolio this way - both the pdf file and the front page of the portfolio: Programme code and entrance year (for example MPARC18; Family name in capitals and first/given name; your application number at universityadmissions.se (the 8 digits for your current application is found in your personal account at universityadmissions.se or antagning.se) For example: "MPARC18_FAMILYNAME_Given-name_application-no"
- The file must be formatted in digital PDF landscape and must not exceed 5MB.
- The portfolio must also include a letter of (intent) motivation as well as a CV. The same letter of (intent) motivation and CV should also be submitted to University Admissions in Sweden (uploaded in your account) along with the other required documents.
- You must submit one portfolio for each Master's programme that you want to apply for.
- You may not submit more than one portfolio to the same Master's programme.

申请时间：1 月 15 日截止

申请材料：学位证明+成绩证明+语言证明+动机信+个人简历+作品集

作品集要求：

- Please upload the portfolio as a PDF along with the rest of your supporting documents.
- The portfolio is an opportunity for you to prove your capability in Industrial Design and to present the more visual qualities of your work. For example you can show;
- your formgiving process where you try out and evaluate different designs/styling of your product or service
- hand sketches and other visualizations including rendered CAD geometries
- how you have involved users in your design process through user studies or other design methods
- how ergonomics have informed your design process
- A portfolio should preferably be in landscape format, but if you already have one in portrait format you can use that as well. We expect to see a lot of images and sketches but you must also be sure to describe in text the projects or items you present. Please use a clear title to the project (Like "New Electric Lawnmower for Shared Use") and write a short description of the project. You can also highlight features in your design that are key to your concept. The time you spent on the project, the number of students involved and what your own contribution was are all examples of additional information we find very useful.
- The volume of the design portfolio is not restricted, however we recommend that you limit it to the 3-5 design projects you have worked with that you consider most relevant to our program.

- The portfolio should contain several work samples and project results and should ideally display and communicate your work and thinking process and creative skills. The digital portfolio (PDF) should be optimized for screen viewing (landscape format).
If you have video published on-line, relevant to your portfolio and application, please include these as a web link in the PDF version of your portfolio (and password if needed).
- **We look at your ability to visually communicate your:**
 - Way of using sketching as a visualization and ideation tool
 - Present 2D and 3D software skills
 - Understanding of 3D and physical form
 - Knowledge of industrial production and technology in general
 - Ability to identify and solving problems through creative methods and thinking
 - Personal expression of design and form language
 - Experience with individual and group work
 - Overall attitude and approach to industrial design

作品集要求：

- According to our application instructions for the Design Master's Programme, your portfolio should be "curated and annotated to demonstrate why you are a suitable candidate for the MSc Design programme. What we are looking for is your aptitude for interdisciplinary work, your ability to explore and learn through design, and your craft skills in design process execution, finishing and presentation."
- So what does that mean?
- Most importantly, you should include items in your portfolio that tell stories of design projects:
 - What was the purpose of the project?
 - What did you learn during the design process?
 - How did you get from the initial purpose to the final solution?
 - How did you validate the solution?
- In other words, your portfolio should present case studies and not only the final results.
- Moving on, interdisciplinary skills refer to combining the strengths of different design disciplines. It could be a project where an industrial designer and a graphic designer work together, for example.
- If you want to include portfolio projects made by interdisciplinary teams, please make sure to point out your individual contribution

作品集要求：

The digital portfolio should present your work from your previous education programme(s). Projects resulting from working experience may also be added to the portfolio.

Quality is more important than quantity. The portfolio should give insight into your skills, development and experience. It should reflect your personal interests. It should emphasize your appropriateness for the MSc Integrated Product Design by showing to what level you master the wide variety of skills needed to start the IPD Master.

➤ Project documentation

The portfolio may consist of at most 8 projects demonstrating not only the final results but also the design process you followed and that steps you have taken. This could be by research and exploration of a product from beginning, through intermediate sketches (sketches must show visual and verbal idea development and problem solving), calculations and considerations (including aesthetics, ergonomics, engineering, material selections and production process choices) to a final product description (including a presentation drawing or rendering of the final product).

1. Clearly indicate the title of each project and indicate a date and environment (company, university, personal) of the project.
2. For each project, write a descriptive paragraph explaining the design problem and your goal with the project
3. Clearly indicate exactly which role you played in the creation of the work submitted. Is it group or individual work? What was your exact contribution to the project?
4. Was the work for a class assignment, a professional assignment or something you pursued on your own?

欧洲工业设计（硕士）院校信息-2020 版本

5. The level of the project (year/semester of your study in which the project was carried out)
6. Name of the supervisor of the project
7. If you have done any user research as a part of the project mention this in the paragraph and, show the results.

Please keep in mind that the admissions committee judges your individual skills. In general, individual projects show your capacities better than group work. If you decide to add group projects, please indicate carefully what your contribution is. If this is not clear to the committee they can't judge your personal skills and this might decrease your chances of being admitted to the MSc track.

Please keep in mind that you are applying for an academic programme and therefore should be able to display your attitude and approach appropriate towards it.

➤ **Include sketches**

Send finished drawings and sketches of original product design concepts. Sketches must show preliminary visual and verbal idea development and problem solving. They are an example of how you develop and organise your projects and ideas. Please note that for all drawings we require you to include the name of the author (if it is not yourself).

If you want to show a short presentation, in addition to your PDF portfolio, it is possible to make a video of 1 minute max. Please include an online link (e.g. youtube or vimeo) in your PDF portfolio.

➤ **Size of the portfolio**

1. The portfolio should be uploaded in pdf format and not exceed 20 MB.
2. The number of pages should not exceed 30.
3. The size of the pages should not exceed A4
4. Landscape format is preferred.

- Your portfolio is another aspect of your application that we find important, even if you have no design background. We look at your portfolio to get a feel for your qualities as a designer, but also to see if your skills match the profile of our design department.
- We value overall conceptual and graphical quality of the projects, and skills in both the physical and digital realm (e.g., sketching and prototyping, but also scripting, programming and electronics). Explicitly mention your personal contribution on the process and result.
- Number of pages and projects
- We regularly come across portfolios that span over 50 pages. This taxes our ability to evaluate applications. Less is often more.
- Form
- Pay attention to the graphical quality of your portfolio.
- Size
- The PDF or PowerPoint of your portfolio should have a manageable size of <5Mb.

申请材料：学位证明+成绩证明+语言证明+动机信+个人简历+身份证明+作品集

作品集要求：

- The portfolio represents the compilation of your work such as sketches, drawings, graphic designs, 3D CAD models and other projects that show your experience and in which your skills are represented. This may also include projects from working experience. You can add a description per project that explains the work shortly (what kind of project, goals, inspiration, solution) and tells what your contribution was in that project.
- Your portfolio can be a (digital) booklet, website or video. Choose what suits the best for you and your work. You can make your portfolio personal by making your own layout that represents you and your creativity. Keep the layout consistent, structured and in visual harmony. When making a booklet or poster, you can use a graphic grid to speed up the building of the portfolio by guiding you where content should be placed.
- The portfolio should consist of at least 2 and at most 10 projects. Quality is more important than quantity.
- The portfolio should be uploaded in PDF format with a maximum size of 5 MB.

学位： Master of Design

学制： 2 年

学费： 15276 欧元/年

语言： IETLS 总分 7.0

申请要求： <https://www.designacademy.nl/study/master/apply-master-course>

申请时间： 4 月 1 日截止

申请材料： 申请表+护照复印件+数码本人照片+学位证明+成绩证明+个人简历+动机信+1 分钟自我介绍视频+作品集+语言成绩+Nuffic 证明

视频要求：

- Practical detail: you can only upload a video in MP4 format using the following browsers: Chrome, Firefox, Internet Explorer and Safari.
- Upload a one-minute video in which you introduce yourself to the selection committee. Make sure you mention what kind of designer you are and why you want to attend the DAE Masters course. You don't have to be "on camera" yourself for the full minute, but we do want to see you, and hear you speak as well. We will evaluate this video based on the information that you communicate, the design representation and your level of English proficiency.

作品集要求：

- Practical detail: please use a PDF format with both pictures and text. Make sure you reduce the PDF file size before you upload the document. Please do not upload separate images; your portfolio should be a single document.
- The purpose of the portfolio is to show a selection of your work, interests and fascinations. It should reflect who you are as a creative person/designer, your position in the (design) world and your vision. Prepare a document that includes images of the concepts and products you have designed and any design-related or other research work or processes you have been part of. You may also include sketches, unfinished or conceptual work.

- Choose projects and experiences that give a good overview both of your fields of interest and your design/design-related experience and qualifications. Works can come from academic, professional, or free projects. The uploaded PDF file should not exceed 5MB.

能力评估：

- In the beginning of October, our Aptitude Assessment Committee will review your application documents. Based on the evaluation of your study-related qualifications and match between your proposed research interest and our thematic clusters, you will receive an invitation to an interview mid-October. Instead of taking an aptitude test, you are asked to upload an elaborated motivation letter (requirements see above), which will, next to your portfolio, be the key element of your application. Applicants who are abroad can be interviewed via skype. In the beginning of November, you will receive a final statement from KISD.
